SOMETHING

# SPECIES-APPROPRIATE PICK ENJOYMENT DELICIA® ALL-SEASON BIRD FEED

## A LOT GOING ON - ALL YEAR ROUND!

**DELICIA®** ALL-SEASON BIRD FEED offers special nature experiences and the feathered friends a full-fledged nourishment. Because our premium feed convinces with the optimal composition of ingredients and nutrients, tailored to the needs of our native bird species. Thus, the diverse **DELICIA®** pickfun-range does not deliver just a tasty incentive but is beyond that a vital food source.

Our native birds lose their natural habitat due to increasingly dense development. This has not only serious effects in the winter months, because due to the global warming, many birds are already no longer flying south. Especially in spring, during the breeding season and when rearing young birds, they are dependent on energy-rich food. Diverse, rich feeding oases in your own garden for **DELICIA®** fans not just for fun observing eager robins, great tits and woodpeckers, above all, they actively contribute to bird protection and thus to preservation of biodiversity.

I HAVE CHANGED  
THE GARDEN. NOW I  
WILL ONLY HAVE DELICIA!  
MMMMH!

I WOULD LOVE TO GO  
THERE TOO! WHERE IS  
THIS GARDEN?

YES  
EXCELLENT!

## CLEAN:

Our products consist only of peeled ingredients and leave therefore no residue on the balcony, terrace or in the garden.

## SPECIES ACCORDING:

The careful compilation of our quality products is based on the needs of the garden birds and is adapted to the beak shape of soft food- and grain eaters.

## PRACTICAL:

Our innovative **PICK-ME-UP BLOCS** fresh packaging is well thought out and enable needs-based use.

## CONTROLLED:

Our products are ambrosia free / cleaned and are strictly controlled.

## ALLURING:

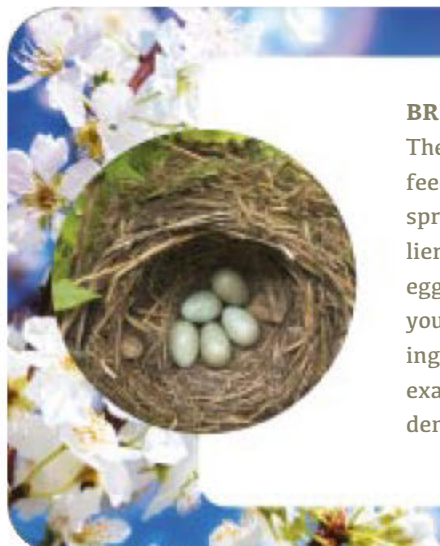

The good ingredients ensure enjoyment at our feathered friends in the garden.

# ALL-YEAR FEEDING

## WHY FEED IN EVERY SEASON?

### BREEDING PERIOD

The most important phase of supplementary feeding during the breeding season is from spring to summer. Many species can breed earlier as a result, also lay more and higher quality eggs. These birds are better at raising their young and achieve a significantly higher breeding success. Also at sufficient nesting places - for example artificial nesting boxes - their breeding density increases significantly.

### SURVIVING IN TODAY'S URBANIZATION

Wild herbs, meadows and green spaces which offer habitat to insects in summer and fall, reduce due to an intensified agriculture and urbanization. Birds need energetic support in their natural search for food!

### IMPORTANT ANIMAL PROTEINS

In the last 25 years, the number of insect species and also their amount steadily decreases. Parallel the number of insectivorous birds also decreased. But many of our grain-eating species require animal proteins, e.g. when rearing young birds. Sparrows are our most valuable allies today when it comes to biological pest control against the box tree moth. Therefore it is important to supply our garden birds throughout the year with valuable supply animal proteins from insects.

### FEED PLACE PROTECTION

If birds know the feeding place in advance, they have a higher chance of finding it in winter time again when they have urgent need of the energy supply.

In the course of climate change, fewer and fewer birds fly to their mediterranean winter quarters. Some birds are already overwintering in years with a milder winter in this country and are reliant to continued supplementary feeding.

### ADDICT TO FOOD SOURCES

It is important to resume feeding early in the fall, thus the garden birds consider the food source as reliable. That's how they can early start emergency care even in sudden winter conditions.

# THE INNOVATION FOR YOUR GARDEN BIRDS

## DELICIA® PICK-ME-UP BLOCS

### RICH IN NUTRIENTS

With the **DELICIA® PICK-ME-UP BLOCS** we offer all bird lovers and -feeders a perfect year-round food for the garden birds. All Ingredients are homogeneously distributed within the **DELICIA® PICK-ME-UP BLOCS**. This guarantees a balanced food intake with every pick.

### VARIATIONS FOR THE WHOLE YEAR

Domestic garden birds are happy about additional food all year round, not only in winter, because for many species of birds the food base is getting always tighter. Regular feeding with the **DELICIA® PICK-ME-UP BLOCS** pleases everyone with a hustle and bustle in their own garden.

### SHELL & AMBROSIA FREE

The **DELICIA® PICK-ME-UP BLOCS** are completely without shells and free from germinable Ambrosia and weed seeds, thus 100% pure feed for our domestic garden birds

### EASY TO INSTALL

The **DELICIA® PICK-ME-UP BLOCS** are simply attached with the supplied hanger. Whether on a branch, railing or flower pot, with the **PICK-ME-UP BLOCS** you will find a free space anywhere.

### INGREDIENTS

**DELICIA® PICK-ME-UP BLOCS**

are made exclusively from  
high quality ingredients.

Made in Germany

WE LOVE THEM!  
THE PICK-ME-UP BLOCS  
ARE TOTALLY INNOVATIVE!

## FOR THE PORTION OF PROTEIN **DELICIA® PICK-ME-UP INSECTBLOCS**

The **DELICIA® PICK-ME-UP INSECTBLOCS** are a purely natural product made from valuable ingredients, e.g. seeds and insects, free from preservatives, genetically modified or other additives as well as artificial flavors. Due to the addition of insects, they are rich in animal Proteins and therefore the ideal supplement for a natural, year-round nutrition of your garden birds. All ingredients are evenly distributed in the **DELICIA® PICK-ME-UP INSECTBLOCS**. They are free from shells and are picked up completely by your garden birds. Ideal for balcony and terrace; there are no remains of shells left at the feeding station.

- » Ideal for year-round feeding on the balcony, on the terrace or in the garden  
- can be attached anywhere
- » Includes paper-coated hanger
- » Without shells and free of ambrosia
- » With insects and therefore rich in animal proteins
- » Free from additives, preservatives as well as artificial flavors and genetic engineering

6 pcs.

# FOR THE NATURAL ENERGY BALANCE

## DELICIA® PICK-ME-UP ENERGIEBLOCS

The **DELICIA® PICK-ME-UP ENERGIEBLOCS** provide sufficient energy reserves to your garden birds to replenish the consumed energy supplies quickly. Here the nutrient-rich ENERGY BLOC cares for the necessary balance of balanced, natural ingredients to maintain the health and performance.

- » Ideal for year-round feeding on the balcony, on the terrace or in the garden - can be attached anywhere
- » Includes paper-coated hanger
- » Without shells and free of ambrosia
- » Free from additives and preservatives as well as artificial flavors and genetic engineering

6 pcs.

### INGREDIENTS

Wheat, tallow, oat flakes, sunflower seeds, hemp, peanut kernels

# INNOVATIVE:

## ALL-SEASON BIRD FEED

### IN VACUUM-PACKED FRESH-PACK

- Thanks to the ecopick Fresh-Packs, your garden birds can enjoy the fresh food the whole year.
- ecopick Fresh-Packs have 3-4 times longer shelf life than conventionally packaged garden bird feed.
- Essential nutrients, vitamins, natural flavors, appearance and taste remain for our domestic garden birds in a Fresh-Pack.
- Moisture protection and oxygen reduction reduce mold and insect pest infestation.
- Aroma-dense ecopick Fresh-Packs contribute with their compression to packaging- and plastic reduction

Enriched with **TriComplex®** extrudate admixtures.\*

- 1./ Thanks to their special manufacturing process, the natural **TriComplex®** extrudate admixtures are microbiologically and micrologically free of the risk of harmful insects compared to conventional feed mixtures.
- 2./ The natural **TriComplex®** extrudate admixtures contain all the essential nutrients that the garden birds need for their complete nutrition.
- 3./ In the natural **TriComplex®** extrudate admixtures, the carbohydrates are highly broken down and the energy from them is available to the garden birds more quickly in comparison to conventional cereal feed mixtures, and the mixtures produced with them also have a significantly better acceptance among garden birds.

# FOR FURTHER GARDEN GUESTS SQUIRREL FEED-MIX

with whole nuts

Unlike many other rodents, squirrels can be found in parks and large gardens also in winter. Because the small rodents do not hibernate but keep dormancy. They therefore already lay numerous food supplies in the summer at. However, not all hiding places will be found in winter again - snow and ice make it difficult to sniff out the arduously collected nuts, seeds and berries.

- Ideal for year-round feeding on the terrace or in the garden
- With whole nuts
- In a practical reclosable pack
- 20% less packaging compared to conventional packs

350g

600g
